ICDAR 2026 - CircleID: Writer Identification

Identify the writer from a scanned hand-drawn circle, including an unknown writer class.

Overview Data Code Models Discussion Leaderboard Rule

Dataset Description

Files:

- train.csv contains labels: `image_id`, `image_path`, `writer_id`, `pen_id`
- test.csv contains: `image_id`, `image_path`
- Images are provided as PNG files

Label format: `writer_id` is a string (e.g. W01, W02, ...). In the Writer Identification competition, predictions must use the same format, or `-1` for unknown writers.

Submission format: Submit `submission_writer.csv` with columns `image_id`, `writer_id`. See the sample submission in this tab for the exact required CSV format.
